WHY TEACH FILM IN THE CLASSROOM?

- A rich tapestry of literature, art and social history exists to enhance film study, making it an ideal subject for interdisciplinary learning.
- Because film is an evolving and changing expression of different stages of American cultural history, a program of in-depth film study challenges students to interpret how Americans – as well as other countries – have viewed American political, social and economic values over the past century.
- Film communicates through sequences and juxtaposition of images and therefore is a significant tool for teaching inference. Likewise, film challenges students to move beyond decoding narrative to a deeper level of understanding—of government, society, and humanity.
- We are living in a world of moving images. The need for quality classes, standards of study, and goals of usage has never been stronger. Students must learn to distinguish between art and commerce, between manufactured images meant to sell and carefully crafted sequences of images meant to communicate.
